GENULINE INVESTMENT

Investment does not consist of plunging---or taking chances.

IT MEANS handling your money safely so that it yields a steady and sure return. It means letting your capital work so that it receives good wages and no penny of it is lost to you, your family or your heirs.

THE INVESTOR DOESN'T GAMBLE. He provides for the future and for financial independence in his old age. He does something which everyone approves and which brings him the blessings of his wife and children.

A REALLY SOUND INVESTMENT is one that pays an income to the owner of the security at regularly stated periods each year.

CERTAIN KINDS OF BUSINESS ENTERPRISES are able to do this much better than others Some lines of business make unusually large profits in times of prosperity and nothing in other periods. In other words, the earnings have a wide degree of fluctuation.

A FEW CLASS S OF INDUSTRY, because of the nature of ther work, are on an entirely different basis-for example, the electric and gas properties.

ELECTRIC AND GAS COMPANIES do not earn exorbitant profits at any time, but, soundly managed, they maintain a reasonable earning power at all times. While their earnings grow in the years of general prosperity they do not slump perilously during hard times-

INDUSTRIES SUCH AS THESE base their business on the law of average They supply every-day necessities of people, industry and commerce.
